Web Developer with a passion for Web application with a background in Law, psychology and French. Currently perfecting skills in; HTML, JavaScript, jQuery, Bootstrap, Json, Node.JS, CSS. Skilled in gathering information on new concepts and designs on future leading projects. In hopes to build more experience in Web development full time.

Technical skills:

- Node.JS, JavaScript, jQuery, CSS, HTML, Bootstrap, MySQL, JSON, API's, Bulma,
- Microsoft, Adobe, GitHub

PROJECTS & CONTRIBUTION:

BonAPPVoyage

Role in the project was to provide creative direction and provided the code to create an efficient header and footer and searching for an API to retrieve information with Spoonacular. While reviewing changes on GitHub with colleagues.

BonAPPvoyage is an APP that focuses on providing clients the ability to find recipes from around the world as well as proving travel information on touristic sites. To promote people to stay home during Covid and cook a new meal. This App demanded lots of research and team work to accomplish a clean code without error.

Tools used:
Bulma ,Sponnacular,API'S and GitHub
